PROFESSIONAL SUMMARY

Data Analyst fresher with hands-on experience in Python, SQL, Excel, and Power BI through data analytics internships and academic projects. Skilled in data cleaning, preprocessing, exploratory data analysis, statistical analysis, data visualization, dashboard development, and regression modeling. Experienced in transforming datasets into clear insights and business-focused visualizations using Python, Excel, and Power BI. Seeking an entry-level Data Analyst role in applying analytical and technical skills in a real-world business environment.

TECHNICAL SKILLS

Programming: Python, SQL, C
Data Analysis: Pandas, NumPy, Excel, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis
Visualization & BI: Power BI, Excel PivotTables, Dashboards, Matplotlib, Seaborn
Tools & Platforms: MS Excel, MS Word, PowerPoint, Google Collab, Jupyter Notebook

INTERNSHIP EXPERIENCE

Data Analytics Intern — Code Alpha Oct 2025

- Applied data analysis techniques to real-world-style datasets and followed core analytics workflows including data preparation, analysis, and interpretation.
- Strengthened practical skills in data cleaning, exploratory analysis, visualization, and communicating analytical insights.

Python Programming Intern — Code Soft Jul 2024

- Strengthened Python programming skills applicable to data manipulation, preprocessing, and analysis tasks.
- Practiced core Python concepts used for working with structured datasets and analytical workflows.

PROJECTS

COVID-19 Data Analysis | Python, Excel, Power BI

- Cleaned and preprocessed COVID-19 datasets using Python and Excel to improve data accuracy and consistency.
- Performed exploratory and statistical analysis to identify regional and time-based trends in cases, recoveries, and deaths.
- Built interactive Power BI dashboards to visualize trends and communicate insights for decision-making.
- Analyzed growth patterns and translated findings into clear, actionable insights.

Used Car Price Prediction | Python, Pandas, Scikit-learn, Matplotlib, Seaborn

- Cleaned and preprocessed used-car data, including handling missing values and preparing features for modeling.
- Developed a regression-based machine learning model to predict used-car prices using mileage, year, fuel type, and other features.
- Applied feature selection and hyperparameter tuning to improve model performance.
- Visualized data patterns and model-related insights using Matplotlib and Seaborn.

EDUCATION

B.Sc. Data Science | Shrimati Indira Gandhi College, Bharathidasan University, Trichy
Passed Out 2026 | Percentage: 79.8%

CERTIFICATIONS

- Code Soft — Python Programming Internship Certificate | Jul 2024
- Code Alpha — Data Analytics Internship Certificate | Oct 2025
